

Rules for motorized road use on Rinker Rock Creek Ranch - East Fork Road & Hatty Gulch Road

- Motorized vehicles are permitted on Hatty Gulch Road and East Fork of Rock Creek Road – other ranch roads are NON-MOTORIZED
- Passenger vehicles (i.e. pickups, sport utility vehicles) or recreational ATV's or UTV's are permitted
 - Large trucks or trailers are not permitted (road conditions are not suitable for such use and increased volume and magnitude of noise and disturbance to the surrounding area directly conflict with University land management purposes)
- Access is permitted from June through November when road conditions are not so wet as to result in further erosion and road deterioration, or when fire danger from vehicular access is not deemed too high
- Stay on existing roads
 - Do not create any new roads
 - No improvements may be made to the road
- Park in designated, established areas. Overnight parking or camping on RRCR land is not allowed
- Limit daily trips to minimize disturbance to UI research, habitat protection, or management of cattle operations
- Close all gates that are closed upon approach immediately after crossing (do not wait for your return trip)
- Carry a fire extinguisher in all vehicles
